

Hangman Game in Python

A fun and interactive command-line Hangman game built using Python. The player must guess the hidden word one letter at a time before running out of lives.

Features

- Random word selection
 - ASCII Hangman graphics
 - Input validation
 - Tracks guessed letters
 - Displays remaining lives
 - Win and lose conditions
 - Beginner-friendly Python project
-

Technologies Used

- Python 3
 - Random Module
-

Project Structure

```
CodeAlpha_Hangman_Game/  
├── hangman.py  
├── README.md  
└── screenshots/
```

How to Run

1. Clone the Repository

```
git clone https://github.com/your-username/CodeAlpha_Hangman_Game.git
```

2. Open the Project Folder

```
cd CodeAlpha_Hangman_Game
```

3. Run the Game

```
python hangman.py
```

How to Play

1. The game randomly selects a word.
 2. Guess one letter at a time.
 3. Correct guesses reveal letters in the word.
 4. Wrong guesses add parts to the hangman.
 5. You have 6 lives.
 6. Guess the word before the hangman is completed.
-

Sample Gameplay

```
=====
🎮 WELCOME TO HANGMAN GAME
=====
```

```
Word: _ _ _ _ _
Lives Left: 6
```

```
Enter a letter: p
```

```
Word: p _ _ _ _
Lives Left: 6
```

Concepts Used

- Variables
 - Lists
 - Loops
 - Conditional Statements
 - String Manipulation
 - User Input
 - Random Module
-

Future Improvements

- Difficulty Levels
 - Categories (Animals, Countries, Technology)
 - Score System
 - Multiplayer Mode
 - GUI Version using Tkinter
 - Sound Effects
-
